Subject: Inquiries and Responses
RFP#: 108-2016 LED Display Boards for Music City Center

Inquiries and Responses:

1. Is there a budget for this project?

We ask that you please provide a cost effective solution as it pertains to the requirements listed in the RFP.

2. Can you please provide the following?

- Electrical Plans (page 7 of RFP): **Please go to the website for electrical plans.**
<http://www.nashvillemusiccitycenter.com/rfp-108-2016-led-video-display-boards-music-city-center>
- Source list of all small, minority-owned, woman-owned, and service-disabled veteran-owned business enterprises: **Please go to the website for AV and Electrical DBE vendor list.**

3. How many people will need to have access to content creation/management? **Up to 5 people will need access to this software**

4. Will it be ok for our computers to have access to your network for remote monitoring? **Monitoring via a secure connection will be acceptable. Successful contractor will have to work with MCC IT to get this setup**

5. Is remote power management required to shut off displays? Or would a standby mode be acceptable? **Standby power will be acceptable as long as it doesn't have a negative effect on the LED life**

6. Would a perforated bezel be acceptable for displays? **No**

7. Is removing the glass mullion part of our scope? **Yes, removal of the glass is part of the scope**
8. Who is responsible for network connectivity? (In Room "A") **Connectivity to each location is the responsibility of the proposer**
9. Can this display be hosted under Cloud solution? **A cloud option would be considered but would also suggest submitting an on premise solution as well.**
10. Is there an AV Rack available for Exhibit "A" Display? If yes, please provide detail and picture if possible. **Space is limited in existing racks. MCC would consider rack space servicing Exhibit Hall A, but it really depends on how much space is needed.**
11. Is there a preferred electrical contractor that you work with regularly out at the MCC?

We don't have a preferred electrical contractor. But we have two companies that have done work in the building:

Broadway Electric Service Corp. (BESCO)
Chuck Maynard
Service Department Manager - Nashville
Direct: 615-916-4611
Email: cmaynard@besco.com

Southeast Electric
Keith Durbin
Vice President
615-672-9751
Email: keith@seiwh.com
